Carlson Grade

Carlson Grade provides machine guidance and tracks machine utilization for a multitude of industries and applications such as pile driving, landfill compaction, excavation and shoveling, drilling, dredging and dozing. Carlson Grade allows operators to visualize their progress through real-time color mapping and absolute positioning.

- Consistent user interface across all solutions
- Flexible and easy to use interface
- Multiple view options available in profile, section and plan
- Directly import from open CAD and Carlson platforms
- Able to handle large surface files
- Real-time machine system view and troubleshooting capability from anywhere in the world
- Peer to peer communication and information sharing capability between all machines
- Works as a stand-alone system or as part of a fleet environment with multiple machines

Carlson Command

Carlson's complete monitoring and data management solution for machine control, Carlson Command, transmits data from machines to the office and from the office to machines in real-time. Command provides absolute oversight for site managers, allowing them to monitor multiple or single machines in a variety of viewing options from any remote location with an internet connection.

- Productivity analysis
- Data management of single or multiple sites
- Direct machine to machine communication and data sharing with live and historical 3D machine playback
- In-cab monitoring and training from office
- Full cut/fill color map with real-time surface updates
- Create and customize tasks, delays and down codes

The Carlson Machine Control team appreciates you and your trust. We are proud to ensure you receive the best output possible from your Carlson Machine Control Solution.
